JOSEPH M. MANGUBAT

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Frontend - Backend Web Developer | Naulo, Sta. Cruz, Zambales, 2213
09614615206 | josephmangubat87@gmail.com | https://github.com/Sep-Vanced

SUMMARY

Web Developer with a strong foundation in Next.js, Laravel API, and the MERN Stack. Skilled in delivering scalable, cloud-native solutions and managing databases with SQL Server. Proven ability to handle projects from initiation to delivery, blending technical expertise with a focus on user-friendly, visually appealing digital solutions. Committed to collaborating on enterprise-grade projects within innovative, progressive teams.

EXPERTISE

- **Frontend:** HTML5, CSS3, Tailwind CSS, Shadcn, JavaScript, React.js, Next.js, Vue.js
- **Backend & APIs:** PHP, Laravel, Express.js, Convex, Supabase, API Development
- **Database:** MySQL, Postgres, MongoDB, PhpMyAdmin, SQL Server
- **Basic knowledge:** WordPress, Python, Java, C++

WORK EXPERIENCE

- **PrimeX Ventures Inc. December 2025 – Present**

Software Developer - Frontend

Developed and maintained web projects utilizing Next.js for the frontend and Laravel API for the backend.
Utilized Postgres for database management and Docker for containerization and consistent development environments.
Collaborated on delivering scalable, enterprise-grade web solutions.

- **Self-Employed August 2025 – November 2025**

Freelance IT Technician

Provided technical repair and maintenance services for laptops, system units, and printers.
Diagnosed hardware malfunctions and performed component replacements to restore device functionality.
Developed custom projects for clients, utilizing a stack that include React.js framework, Html, Php and Javascript.

- **President Ramon Magsaysay State University January 2025 – May 2025**

On the Job Trainee

Assisted in creating client websites and gained hands-on experience with various web technologies.
Provided technical repair and maintenance services for laptops, system units, and printers.
Learned and applied industry best practices to deliver quality digital outputs.

- **Self-Employed September 2023 – December 2024**

Freelance Web Developer

Developed custom web projects for clients, utilizing a stack that included HTML, PHP, and JavaScript.
Managed full project lifecycles from initial requirements gathering to final delivery and system presentation.
Focused on creating user-friendly and visually appealing digital solutions.

EDUCATION

Bachelor of Science in Information Technology
President Ramon Magsaysay State University
2021 – 2025

Senior High School & Junior High
School Santa Cruz Academy, Inc.
2015 – 2021

KEY SKILLS

- **Technical Problem Solving:** Strong ability to debug complex issues across the full stack.
- **Project Management:** Experienced in handling full project lifecycles, from initiation to delivery and presentation.
- **Collaborative Development:** Proven track record of working within innovative, progressive teams to deliver enterprise-grade solutions.
- **Adaptability:** Quickly learning and implementing emerging technologies and frameworks.

STRENGTHS

- **Technical Problem-Solving:** Resolving complex issues across Next.js, Laravel API, and Postgres.
- **Solution Delivery:** Developing scalable, maintainable enterprise-grade web applications.
- **Adaptability:** Mastering new technologies like Docker and the MERN stack.
- **Collaboration:** Working effectively with cross-functional teams and clients.
- **Versatility:** Expertise spanning software development, web commissions, and hardware repair.

PROJECTS

- **Weather-app | Next.js, TypeScript, Tailwind CSS**

Developed a modern, mobile-first application featuring real-time geolocation-based local weather, hourly forecasts, and a 7-day outlook with a polished UI.

- **InsightFlow | TypeScript, Next.js, Tailwind CSS**

Built a modern SaaS analytics dashboard focusing on clean data visualization and responsive frontend architecture.

- **Study-Planner | TypeScript, AI Integration**

Created an AI-powered platform that generates optimized study schedules, utilizing TypeScript for robust state management.

- **QR-Code-Reader | TypeScript, Web APIs**

Implemented a functional scanner allowing users to obtain product information and pricing directly via their smartphones.

- **Typing Speed Tester | TypeScript, JavaScript**

Provides a random paragraph for the user to type as accurately and quickly as possible.

- **MED-COUNT | JavaScript | PHP, MySQL**

Developed an automated web-based platform for medical supply management for PRMMH.

INTROSPECTION

I hereby declare that the information provided above is accurate to the best of my knowledge, and I am committed to applying my skills and efforts to contribute effectively to the organization's success.
